DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Adan Ayala on 29 January 2007.

The application has been amended as follows:

- Claim 26 has been cancelled.

Allowable Subject Matter

2. Claims 1, 3, and 5-25 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claims 1, 3, and 5-25 are allowable because of the apparatus with a retention member, with a contacting surface, pivotally obtaining an extended position disposed substantially above a support surface and a retracted orientation disposed below the support surface, that the contacting surface is completely below the support surface when in the retracted position, and the retention member pivots about an axis that is substantially perpendicular to the direction it moves as set forth in the claims. Shibatta et al. and Scott et al. both disclose a retention member that can be in the claimed extended or retracted position but fail to disclose that the retention member pivot is perpendicular to a direction the retention moves. Winstrup fails to disclose a contacting surface that is

completely below the supporting surface when in the retracted position. None of the prior art cited discloses an apparatus that incorporates a retention member, with a contacting surface, pivotally obtaining an extended position disposed substantially above a support surface and a retracted orientation disposed below the support surface, that the contacting surface is completely below the support surface when in the retracted position, and the retention member pivots about an axis that is substantially perpendicular to the direction it moves to clamp a member to be worked. Therefore, in view of what has been stated above, the claims are allowable over the art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
